Quartex 4D

3D Printer

Accessories

ADDMill +/-
Q-Light
Q-Cleaner

3D Printer

| | |
|--|---|
| Mechanics: | Z with runners and ball screw |
| Dimensions: | L 230 W 260 H 480 mm |
| Print volume: | L120xW68xL200 mm |
| Led matrix: | 50 W / 405 nm collimated |
| Layer thickness: | 25, 50, 100 microns (depending on the resin profile) |
| Curing speed at 100 microns: | 10-40 sec / layer (depending on the resin used) |
| LCD Touch Screen: | 5.5" (2560 x 1440 px) |
| Connectivity: | USB - LAN - WIFI |
| Resolution: | X / Y 47 microns |
| Resin profiling with operating protocols: | <ul style="list-style-type: none">• Resin for precision models• Orthodontic model resin• Resin for surgical guides, bites and splints, customized impression trays• Temporary teeth resin• Castable resin |
| Machine control software: | Including |
| Slicer software: | Including |

The Quartex 4D printer is completely built and assembled in Italy.

Accessories

ADDmill +/-

Software and hardware module.

Exclusive technology with additive / subtractive recovery for Roland DWX-51D, DWX-52D and DWX-52DCI milling machines. The system ensures a perfect and standardized fit. With this module it is possible to use the optimized positioning of orthodontic models increasing productivity.

| | |
|-------------------------------------|------------------------|
| Dedicated plates | Fit optimization |
| Dedicated slicer software | Quality standards |
| CAM Upgrade software (DGS-Print 3D) | Increased productivity |

Q-Light

Q-Light is equipped with a matrix of UV LEDs and mirrors strategically placed inside the box. This ensures that a printed product is illuminated from all sides allowing a rapid and uniform hardening cycle. The active area of 32L, 20W, 20H cm allows you to easily treat large objects or multiple products simultaneously. Q-Light allows you to stabilize printed material after cleaning, ensuring that it maintains its final properties.

| | | | |
|-------------|-----------------------|-------------------------|-------------|
| Power(W): | 120W | Dimension (L*W*H): | 43*30*35cm |
| Voltage: | 110V/ 220V switchable | Curing Area (L*W*H): | 32*20*20cm |
| Net Weight: | 14,5 Kg | Touch LCD screen (L*W): | 57.6*43.2mm |
| Wavelength: | 405nm | Fan size (L*W*H): | 85*85*10mm |

Q-Cleaner

Ultrasonic tank thermostated in stainless steel for the resins heating and cleaning process.

| | | | |
|--------------------|-----------------|-------------------|-------------|
| Tank capacity: | 10L | Ultrasonic power: | 240W |
| Material: | Stainless steel | Voltage: | 220V 50Hz |
| Cleaner frequency: | 40kHz | Weight: | Approx. 7kg |
| Heating power: | 250W | | |
